

Looking for a Mathematics Enrichment for your centre's K2 children?

How about one that uses **Maths Magic**, **Card tricks**, **Puzzles**, **Paper craft**, **Games**, **Stories** and **Hands-on Activities** to teach maths, nurture creativity and develop thinking skills? Introducing Creative Maths for K2 - **Kinder Mathemagician**.

Kinder Mathemagician

Objectives

Kinder Mathemagician is a unique Mathematics and Creativity Enrichment programme that

- ✓ stimulates intellectual curiosity,
- ✓ sharpens observation skill,
- ✓ promotes discovery,
- ✓ hones creativity,
- ✓ develops mathematical thinking and logical reasoning,
- ✓ imparts maths problem solving skills,
- ✓ trains diagram visualising skill (spatial intelligence),
- ✓ develops intrinsic motivation in learning Maths!

In the programme, we will reinforce Mathematical concepts such as

- Number Sense
- Numbers in words
- Ordinal numbers
- Addition and Number Bonds
- Subtraction
- Shapes
- Length
- Mass
- Money
- Table (Row and Column)
- Problem solving strategies: (1) Pattern Recognition, (2) Experiment with real objects, (3) Acting it out

Topics

Creative Maths has been very well received and endorsed by local MOE and international teachers. We have successfully conducted this workshop in over 30 primary schools for students of varying abilities and different levels. In 2010, we have successfully launched Creative Maths for Kindergarten 2 children called – Kinder Mathemagician. The activities are hands-on, fun and interactive thus enabling us to capture young children's attention throughout the programme.

Creative Maths uses so many unique methods of teaching that we were invited by Channel 8 to share interesting Maths learning experiences with our little viewers on TV! The programme was broadcasted on Sunday 11am and we shared fun Maths Magic and Games with our viewers where they have fun learning Mathematics and appreciating the use of Mathematics in their daily lives!
